Timing systems are critical engine components. A worn, deteriorated or overdue belt can lead to serious engine damage, so replacement intervals and visible belt condition should be taken seriously.

Timing-system work

default watermark

- Conventional dry timing-belt replacement
- Water-pump replacement where appropriate
- PSA and other wet-belt inspection and replacement
- Inspection for belt debris or oil-system contamination
- Auxiliary-belt replacement when required

If additional damage or contamination is found after dismantling, the findings are explained before extra chargeable work is carried out.
